

Ahmed Mostafa

Junior Penetration Tester | Web Application & Mobile Pentesting

01018679337 • Giza, Egypt • ahmed.m.pentester@gmail.com • www.linkedin.com/in/ahmed-mohamed-59845428a • www.github.com/amx2ahmed

PROFESSIONAL SUMMARY

Cybersecurity professional specializing in penetration testing, offensive security, and network security, with hands-on experience in web application, network, Active Directory, and mobile security assessments. Skilled in the penetration testing lifecycle, including reconnaissance, vulnerability assessment, exploitation, and reporting using tools such as Burp Suite, Nmap, Metasploit, and Wireshark.

Holder of eWAPTX, CEH, CCNA, and CCNP certifications, with practical experience through TryHackMe and Hack The Box labs. IEEE Cybersecurity Vice Head with a strong interest in security research, vulnerability assessment, and building secure systems.

TECHNICAL SKILLS

- **Penetration Testing:**
Web Application Security Testing, Network Penetration Testing, Active Directory Security Assessment, Mobile Security Testing, OWASP Top 10, CVE Analysis, Exploitation, Privilege Escalation, Post-Exploitation
- **Security Tools:**
Burp Suite, Nmap, Metasploit Framework, Nessus, Wireshark, SQLmap, Nikto, WPScan, ffuf
- **Vulnerability Assessment & Reporting:**
Vulnerability Assessment, Threat Modeling, Risk Analysis, Security Auditing, Data Flow Mapping, Technical Reporting, Security Documentation
- **Networking & Infrastructure:**
TCP/IP, Routing & Switching, VLANs, OSPF, NAT, ACLs, HSRP, VPNs, Network Troubleshooting
- **Programming & Scripting:**
Python, Bash Scripting, JavaScript, Java, SQL, C++
- **Operating Systems & Platforms:**
Kali Linux, Ubuntu, Linux Administration, Windows, Windows Server, Active Directory

PROFESSIONAL EXPERIENCE

Cybersecurity Trainee – WE Innovate | Jul 2025 – Aug 2025

- Performed web application penetration testing following OWASP Top 10 methodology, identifying SQLi, XSS, IDOR, and broken authentication vulnerabilities.
- Conducted network and Active Directory penetration tests in simulated enterprise environments, including enumeration, privilege escalation, and lateral movement.
- Delivered structured security reports with CVSS severity ratings, root cause analysis, and prioritized remediation recommendations.
- Completed mobile application security assessments covering both static and dynamic analysis techniques.

Network and Security Intern – DEPI | Apr 2024 – Oct 2024

- Designed and deployed enterprise network topologies with VLANs, OSPF dynamic routing, and HSRP high-availability failover.
- Hardened network infrastructure by implementing ACLs, Port Security, and NAT policies to enforce least-privilege access.
- Performed network security audits, mapped data flows, and produced documentation to identify misconfigurations and reduce the attack surface.

CERTIFICATIONS & ACHIEVEMENTS

- eWAPTX – eLearnSecurity Web Application Penetration Tester eXtreme
- CEH – Certified Ethical Hacker (MaharaTech)
- CCNP ENCOR – Cisco Certified Network Professional (Enterprise Core)
- CCNA – Cisco Certified Network Associate
- eCPPT – eLearnSecurity Certified Professional Penetration Tester (In Progress)
- Top 3% globally on TryHackMe | Active CTF competitor on Hack The Box

EDUCATION

B.Sc. Computer Engineering – Modern Academy for Engineering and Technology | Expected Jul 2027

GPA: 3.45 / 4.0 | Relevant Coursework: Data Structures & Algorithms, Database Management, Software Engineering
